

# dermatopathology essentials 2021 - virtual

It is a particular pleasure, in name of the SGDV, to invite you to the third «dermatopathology essentials» course.

The one-day-course is one of the official and obligatory SGDV-courses for dermatology residents. Pathology and dermatology residents, as well as specialists with interest in dermatopathology are warmly welcome to participate. Dermatopathology is an ancient and fundamental field of dermatology, which showed very exciting developments during last 20 years.

We organize the course yearly, and we divided the most important dermatopathology knowledge in a 3-year lectures-curriculum: who participates to all three courses (3 years) receives a complete dermatopathology refreshment of the essential knowledge of this field. The lectures are focused on clinical-pathological correlations, especially to underline the clinical importance of dermatopathology.

The goal of this course is to give you the most important skills, and to show you the particular importance of dermatopathology for your daily work as clinician or as pathologist.

You will experience an exciting excursion into the microscopic world under the surface of the skin.

Looking forward to meet you online in October 2021.

Laurence Feldmeyer & Helmut Beltraminelli

# program 23<sup>st</sup> october 2021

09.00-09.30	neutrophilic dermatoses	laurence feldmeyer
09.30-10.00	eosinophilic dermatoses	laurence feldmeyer
